

**CHANGES TO DAIRY REPORTING
(October 5, 2020)**

IMMEDIATE CHANGES TO DAIRY REPORTING

As of October 5, 2020, Canadian Cattle Identification Agency (CCIA) will stop being the responsible administrator for dairy bovine and white dairy tags, and reporting associated with those tags will be submitted to the newly minted DairyTrace program.

If you have dairy bovines identified with white tags you will need a DairyTrace account.

DairyTrace customer service can be contacted at **1-866-55-TRACE (1-866-558-7223)** or by email at info@DairyTrace.ca

MIXED LIVESTOCK OPERATORS

Nothing will change for the iconic CCIA yellow tags. The CLTS database remains active for producers with beef cattle, sheep, bison, goat, cervids and even dairy producers who use yellow tags.

If livestock operators submit a mix of white dairy tags with yellow tag data, the white dairy tag information will be re-directed to the DairyTrace program automatically. The charts below will specify how to proceed with these mixed (yellow/white tag) situations and event specific submissions. However, dairy producers who use a mix of yellow and white dairy tags, must have an active DairyTrace account for submitting their white dairy tag data.

In order for the data to flow between DairyTrace and CCIA/CLTS, the DairyTrace account number, or DairyTrace **Stakeholder Number**, needs to be added to a current CCIA/CLTS account.

DATA TO CONTINUE REPORTING TO CLTS

There are no changes required for the following operation types that have white dairy tags. These operation types may continue to report to CCIA/CLTS as per usual. When required, data shall be transferred by CCIA to the DairyTrace database.

<i>OPERATIONS THAT WILL CONTINUE REPORTING TO CCIA/CLTS as usual</i>
Importers – mixed loads
Exporters
Intermediate sites (fairs/exhibitions/feedlots/auction markets/etc.)
Terminal sites

While any of the above listed operation types dealing with animals that have white dairy tags may report directly to either Responsible Administrator (CCIA/CLTS or Lactanet/DairyTrace), for those

(October 5, 2020)**

operations that separate reporting by event type, CCIA/CLTS **CAN CONTINUE** to accept many animal events for **dairy bovine white tag numbers**.

<i>ANIMAL EVENTS</i>	<i>WHERE CAN THE EVENT DATA BE REPORTED?</i>
Birthdate	CAN CONTINUE TO REPORT TO CCIA/CLTS
Imported	CAN CONTINUE TO REPORT TO CCIA/CLTS
Move In	CAN CONTINUE TO REPORT TO CCIA/CLTS
Cross Reference	MUST REPORT TO DAIRYTRACE DIRECTLY
Replaced	MUST REPORT TO DAIRYTRACE DIRECTLY
Move Out	CAN CONTINUE TO REPORT TO CCIA/CLTS
Exported/ Temp Exported	CAN CONTINUE TO REPORT TO CCIA/CLTS
Sighted	CAN CONTINUE TO REPORT TO CCIA/CLTS
Retired	CAN CONTINUE TO REPORT TO CCIA/CLTS
Disposed	CAN CONTINUE TO REPORT TO CCIA/CLTS
