Tag and Tag Accessories Catalogue – everything in the CCIA webstore (where to find it and how to order online)

It doesn't matter where you are in Canada – the Canadian Cattle Identification Agency (CCIA) webstore was established to provide producers with the same opportunity to purchase tags and tag related products, regardless of your location.

The webstore offers a variety of products, competitive prices and all approved tag brands in one place. The webstore features all things tag related, including visual management tags and accessories like applicators.

The webstore can be accessed 24/7. We know driving to town to purchase tags isn't always the first priority when there is livestock that needs to be tended to. The webstore offers a convenient way to shop, without ever leaving your home. Tags and accessories are delivered by mail quickly and securely.

A retail catalogue of products is posted on the CCIA website under <https://www.canadaid.ca/wp-content/uploads/Tag-and-Tag-Accessories-Catalogue.pdf> so you can compare webstore retail prices and products before logging into the webstore. The catalogue contains images and descriptions of all products offered for sale through the CCIA webstore, as well as shipping information and instructions on how to order for the first time and directions on creating a webstore account.

Breed tags are only available from the CCIA webstore. All orders are shipped within 24 hours once your order is approved by the corresponding breed association. Orders are sent by standard Canada Post. For rush orders, shipping must be arranged by phone with CCIA prior to placing the order.

You will require a Canadian Livestock Tracking System (CLTS) account to make a purchase from the webstore. If you have purchased tags in the past, then you already have a CLTS account. If you do not know your CLTS account information, call us to set-up your login.

You may not be familiar with the CLTS and its functionality, but utilizing the CLTS and the mobile version (CLTS MOBO APP) you will have a user-friendly tool to help you report data, including; transportation information, premises identification obligations and movement reporting.

Tags and readers may be purchased directly on-line at <https://tags.canadaid.ca> or by calling CCIA Client Support toll free at **1.877.909.2333**. Generic beef tags (non-breed specific) are also available through the network of approved tag dealers across Canada.

A little bit about CCIA:

We are the Canadian Cattle Identification Agency (CCIA), we are not government and we are an industry-initiated, not-for-profit organization incorporated to establish a national livestock identification database known as the Canadian Livestock Tracking System (CLTS). CLTS account holders are able to report important information to the database such as animal identification, premises identification and movement of the animal. We also have a mobile version that can be downloaded to your smartphone as an APP, giving you access to the entire database in the palm of your hands.

With proposed amendments to federal regulations, producers will have increased responsibilities including timely reporting of data, transportation information and premise identification. The Canadian Cattle Identification Agency is making it easier than ever to keep your records up-to-date and remain compliant.
